

Power Up
Attn.: Jussi Levanen

I have been using Power Up for approximately one year and have come to the conclusion that this is an excellent product.

Based on my own experience, such as:

- (A) It has improved the throttle response even under extreme conditions.
- (B) It has increased piston life 5 to 1
-I have not replaced the pistons and rings in the last five months, normally it is done once a month.
- (C) Power Up is used with grease that we repack our bearings with and we have had no bearing failures.

I wanted to let you know how Power Up has been working for ATK Motorcycles owners and I would not hesitate to recommend your product to other motorcycle owners.

Thank You
